Do we have any new PFAS research products coming out in 2019?

Hi Andy,

We're lining up presenters for the December 16 PFAS call based on the list you sent in October. Elaine has expressed again that she'd rather wait for another call. We may still try to have her do this call, but please see my questions below first.

Ex. 5 Deliberative Process (DP)

Do you have any other new suggestions for the December call?

Thanks,
Erin

Hi Erin,

As I mentioned in my earlier email, I would really prefer to provide a presentation after I have sat in on at least one call so that I can get a sense of the format and the audience. Please go ahead and send me a calendar invite to these bimonthly meetings.

Then you can schedule me for the following call (Feb?).

Thank you so much,
Elaine

Hi Elaine,

I wanted to confirm that you're available to give an exposure methodology work in progress presentation on December 16th for our ECOS-EPA Bimonthly PFAS call? It's from 4-5pm ET and your presentation would be 15 minutes long.

Thanks,
Erin

Hi Lisa,
I am not going to be able to pull something together by then. Ben and Emma (#4) would be good.
If I could listen in on the call, it would help me get an idea of what might be useful.
Thanks,
Elaine

Hi Elaine,
Please provide a short description of the developing PFAS exposure tools, including a consumer product database. What is the status of this work and do you have something that states could use?

Would you be available on October 21 to present on our call with ECOS/states?

Thanks,
Lisa Matthews

Subject: Request for ECOS-EPA Bimonthly PFAS Call agenda topics (October 21)

Hi Andy and Tom,
In preparation for our upcoming October 21st ECOS-EPA bimonthly PFAS call, we would like to again request your help identifying appropriate and relevant PFAS agenda topics to share with the states. We've gone through the PFAS Milestone Tracker and made a list of the recently completed "milestones" (attached). Not sure any of them are really completed products, but more so steps on the way to a completed product. Could you please let us know if any of these would be substantive enough to give a 15-minute presentation on the call, and if so, identify the appropriate presenters? Disposal is a big issue for the states.

We need to identify 2 EPA topics – if you don't think there are two milestone topics that would suffice, please identify other topics that would be of interest to the states. Also attached is the ECOS-EPA PFAS call topic history if you need a reminder of past topics.

We will need title, presenter and a short paragraph description of the agenda topic by early next week.

Thank you,
Lisa
